

Notice of Allowability

Application No.

10/684,601

Examiner

Vickey Ronesi

Applicant(s)

GUERIN ET AL.

Art Unit

1714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the amendment filed on 10/24/06.
2. ☒ The allowed claim(s) is/are 1-7.
3. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☐ All b) ☐ Some* c) ☐ None of the:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Seng on 1/16/2007.

The application has been amended as follows:

- In claim 1,
 - o line 6, replace "reacting a nitrile polymer" with --a metathesis reaction--.
 - o line 53, before Formula IV, delete the phrase ", wherein".
- In claim 5,
 - o line 2, replace "mixing at least one" with --mixing the least one--.
 - o line 4, replace "2.7, at least one" with --2.7, the at least one--.
 - o line 4, replace "optionally at least" with --optionally the at least--.
- In claim 6, delete lines 3-5, "comprising at least one, optionally hydrogenated, nitrile rubber polymer having a Mooney viscosity (ML 1+4 @ 100°C) in the range of from 50-30 and a polydispersity index of less than 2.7, at least one filler and at least one cross-linking agent."

Statement of Reasons for Allowance

The present claims are allowable over the closest prior art Oyama et al (US 5,651,995) and Fujii et al (US 6,489,385) for the following reasons:

The present claims are drawn to a polymer composite consisting of at least optionally hydrogenated, nitrile rubber polymer having a Mooney viscosity in the range of from 50-30 and a polydispersity index of less than 2.7, at least one filler, and optionally at least one cross-linking agent, wherein the nitrile rubber is prepared by a metathesis reaction in the presence of one or more metathesis catalysts of Formula I, II, III, or IV.

Oyama et al discloses a vulcanized rubber composition comprising a nitrile group-containing copolymer rubber having a Mooney viscosity of 30-100 and a Mw/Mn of 2.3-5.5; sulfur or peroxide vulcanizing systems; and fillers—wherein the composition is injected molded to make articles such as gaskets, seals, belt, etc. While Oyama et al discloses a nitrile group-containing copolymer rubber having a Mooney viscosity and Mw/Mn that overlaps with the presently claimed ranges, Oyama et al's rubber has an alkylthio group having 12-16 carbon atoms (see claim 1) which results in a chemical difference from the presently claimed metathesis-catalyzed rubber.

Fujii et al discloses a composition comprising a nitrile group-containing nitrile rubber having a viscosity ranging from 5-135, preferably 20-90, with a polydispersity (Mw/Mn) of 3-5 and various other components such as vulcanizing agents and fillers. While Fujii et al discloses a nitrile group-containing nitrile rubber having a Mooney viscosity that overlaps with the presently claimed range and a Mw/Mn that is close enough to the presently claimed range, Fujii

Art Unit: 1714

et al's rubber is reacted with an aging inhibitor (col. 3, lines 21-36) which results in a chemical difference from the presently claimed methathesis-catalyzed rubber.

Thus, it is clear that Oyama et al and Fujii et al do not disclose or suggest the claimed invention.

The terminal disclaimer filed on 10/24/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,780,939 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Further, two provisional obviousness-type double patenting rejections over later-filed U.S. application 10/728,029 (published as US 2004/0132891) and same-day filed U.S. application 10/684,867 (published as US 2004/0113320) had been set forth; however, per USPTO practice, given that the obviousness-type double patenting rejections would be the only rejections remaining in this application as provisional rejections over copending applications, these obviousness-type double patenting rejections are withdrawn.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1714

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickey Ronesi whose telephone number is (571) 272-2701. The examiner can normally be reached on Monday - Friday, 8:30 a.m. - 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
